DONNOVAN WINT

SUMMARY

A front end web developer specializing in technologies such as LAMP, Wordpress, React, and Vue. I am successful at building complete web applications with a focus on quality design, fast performance, and lead conversions.

PROJECTS

Advanced Equipment Sales

HTML, CSS, JAVASCRIPT

Client website redesigned to improve user navigation and increase leads and conversions.

Greenwald Research

HTML, CSS, JAVASCRIPT, VUE

Client site designed with a simplistic but clean look and feel.

John Vena Inc.

HTML, CSS, JAVASCRIPT, VUE, NUXT

Client website rebuilt with a greater focus on their services and a better search experience for their products.

WORK EXPERIENCE

WEB DEVELOPER

Sagefrog Marketing Group

Jun 2019 – Present

- Front End Web Developer responsible for deploying new features and improving systems performance and reliability.
- Developing, testing, deploying, and maintaining web applications efficiently, improving product's time to market.
- Creating Server and Client side architecture for sophisticated HTML5 and javascript applications.
- Mentoring junior programmers to become more efficient in problem solving and debugging issues that arise during web application development.
- Removing render blocking code and building custom solutions to improve clients' website page speed scores and load time, leading to increased leads and customer conversions.
- Routinely implementing modern features as they gain appropriate browser support to decrease development time and improve quality of company's code base.

WEB DEVELOPER

Freelance

Jan 2012 – Jun 2019

- Built full redesigns of existing websites to improve user experience, enhance UI/UX and strengthen search engine rankings.
- Designed, implemented, and maintained web applications and sites for scalability in fast-paced environment.
- Reviewed code to validate structures, assess security and verify browser, device, and operating system compatibility.
- Tested and debugged websites and performed troubleshooting tasks prior to deployment.
