WORK EXPERIENCE

Sagefrog Marketing Group

WEB DEVELOPER   *June 2019 - Present*

- Front End Web Developer responsible for deploying new features and improving systems performance and reliability.
- Creating Server and Client side architecture for sophisticated HTML5 and javascript applications.
- Mentoring junior programmers to become more efficient in problem solving and debugging issues that arise during web application development.
- Removing render blocking code and building custom solutions to improve clients' website page speed scores and load time, leading to increased leads and customer conversions.

Freelance

WEB DEVELOPER   *January 2012 - June 2019*

- Redesigned existing websites to improve user experience, enhance UI/UX and strengthen search engine rankings.
- Designed, implemented, and maintained web applications and sites for scalability in fast-paced environment.
- Reviewed code to validate structures, assess security and verify browser, device, and operating system compatibility.
- Routinely implementing modern features as they gain appropriate browser support to decrease development time and improve quality of company's code base.
