

DONNOVAN WINT JR.

SENIOR FULL STACK SOFTWARE ENGINEER

Philadelphia, PA | 484-888-1308 | donnovanwint@gmail.com | donwint.com

PROFESSIONAL SUMMARY

Senior software engineer with 7+ years building and maintaining enterprise web platforms across frontend, backend, and content-management systems. Experienced delivering React, Next.js, Vue.js, WordPress, PHP, and REST API solutions from architecture through production support. Recent work includes NASCAR fan and marketing platforms, headless CMS implementations, authentication and profile systems, mobile-app content APIs, and an LLM-powered product demonstration at AlphaSense.

CORE TECHNICAL SKILLS

FRONTEND	JavaScript, TypeScript, React, Next.js, Vue.js, Nuxt.js, React Native, HTML5, CSS3, responsive UI development
BACKEND & APIS	PHP, Node.js, Python, Java, REST APIs, GraphQL, webhooks, authentication and session management
CMS & PLATFORMS	WordPress, headless WordPress, HubSpot CMS, Adobe Experience Platform, Adobe Journey Optimizer
DATA	MySQL, PostgreSQL, MongoDB, Redis, schema design, query optimization, content and marketing data integrations
QUALITY & DELIVERY	Git, GitHub Actions, Playwright, Selenium, Postman/Newman, accessibility, Core Web Vitals, cross-browser testing
CLOUD	AWS CloudFront, CloudWatch, S3, Lambda, RDS, IAM; Datadog monitoring and production logging

PROFESSIONAL EXPERIENCE

NASCAR | Senior Software Engineer / Development Manager May 2023 - Nov 2025
Owned web-platform projects serving NASCAR and track properties, partnering with product, design, marketing, mobile, and platform teams.

Fan Rewards and My Profile

- Rebuilt profile and rewards experiences spanning WordPress, React, PHP APIs, Auth0/OIDC authentication, session handling, driver preferences, subscriptions, and loyalty data. Defined API contracts and validated critical account flows through automated and manual regression testing.

Adobe Journey Optimizer Migration

- Built API-driven content workflows that transformed NASCAR race schedules, driver data, and editorial feeds into reusable email templates in Adobe Journey Optimizer. Replaced manual campaign assembly with structured, testable integrations and documented operational handoffs.

Headless and Mobile Content Delivery

- Maintained WordPress as a shared content backend for web and React Native applications. Developed and supported REST endpoints, content models, caching behavior, and integration patterns used by both traditional WordPress frontends and React-based experiences.

Careers and Enterprise Web Properties

- Led delivery of responsive WordPress properties and internal publishing tools, including the NASCAR careers platform. Balanced editor usability, component reuse, accessibility, performance, and reliable deployment across multiple environments.

AlphaSense | Senior Software Engineer Aug 2022 - May 2023
Developed customer-facing web experiences and integrations for an enterprise financial-search platform.

Corporate Platform Rebuild

- Worked on a WordPress-powered content platform with a React/Next.js frontend, reducing plugin dependence and improving the maintainability and performance of shared page components, content APIs, and publishing workflows.

ALFred LLM Demonstration

- Implemented a lightweight product demonstration that connected an LLM-driven conversational interface to AlphaSense product APIs. Developed the web experience, request flow, and prompt behavior used to demonstrate product capabilities to prospective customers.

Frontend Quality and APIs

- Built and tested REST integrations, resolved Core Web Vitals issues, and used browser and automation tooling to verify responsive behavior, accessibility, and releases across supported environments.

Apr 2022 - Aug 2022

PriceWeber | Senior Software Engineer

- Delivered custom WordPress, PHP, JavaScript, and CSS implementations for enterprise marketing programs, connecting frontend components to CMS content and external APIs.
- Performed cross-browser, responsive, accessibility, SEO, and performance validation before production releases and translated audit findings into actionable engineering work.
- Built repeatable data and reporting integrations that reduced manual campaign operations and gave client teams reliable content-management workflows.

Jun 2019 - May 2022

Sagefrog Marketing Group | Software Engineer

- Built and maintained more than 30 B2B websites using custom WordPress themes, plugins, PHP, JavaScript, CSS, MySQL, and third-party integrations.
- Architected a headless WordPress and Vue.js platform for John Vena Inc., defining content models and REST endpoints that separated editorial workflows from the customer-facing application.
- Established reusable development patterns, code-review practices, and launch checklists covering responsive behavior, accessibility, SEO, performance, and production readiness.
- Mentored developers and worked directly with design, strategy, and client stakeholders to turn business requirements into maintainable technical implementations.

SELECTED CLIENT WORK

Reynolds American

- Developed WordPress-based campaign and content experiences using PHP, JavaScript, and CSS, with attention to responsive behavior and repeatable content management.

Tradecentric

- Implemented WordPress and HubSpot-connected marketing features that supported lead-generation and campaign workflows without requiring nontechnical teams to edit code.

Greenwald Research

- Built and maintained a custom WordPress site with reusable page components, structured content, and responsive frontend behavior.

EDUCATION & CERTIFICATIONS

Bachelor of Science in Information Technology | Penn State Abington, 2019

Certifications: Responsive Web Design; Front-End Development Libraries (freeCodeCamp)
